

Seed Passion
since 1939

Catalogue

Welcome to REM Srl world of seeds!!!

It is a great pleasure introducing our company to all of you for a better knowing of our vegetable, grass, flower seed activity.

Rem is an ever-young seed company located in Cesena and it is proud of breeding, producing and marketing seeds with EUROSEED brand.

The members of our staff have a long experience as regard vegetable seed crops production (OP and Hybrid) and our big family has been commercializing seed crops since 1939.

Nowadays REM has established itself as a prominent company into the seed market and we are now reliable suppliers for several fresh market Companies in Europe and all over the world.

Next to all vegetables varieties, we can supply also herbs, legumes, grass, organic seeds and much more!!

The uniqueness of our Company arises from the following factors:

1. A multi-disciplinary approach;
2. Self-production in our region, the best in Italy for the seed production due to a mild climate;
3. A geographical location in the Center-North of Italy.

Thanks to all these ingredients, we can offer not only our own seed productions, but also really profitable contracts of multiplication, staying at your service for all your needs. After getting your basic seed, we reproduce any kind of varieties, supported by a great knowledge and paying a wide attention to varietal purity, germination, seed-vigour, moisture content and the presence of diseases.

This could be the opportunity to start a serious and steady business relationship lasting in the time. If you need further details about REM Srl, please contact us to info@byrem.com or visit our web-site to www.euroseed.ws
